

# Red Diamond™ Air Booster

Aftermarket Solutions.

## Fill Your Coach Tires Fuller, Faster

Travel with confidence. Life on the road is better when your motorcoach tires have precisely the right PSI (pounds per square inch) for safe driving, easy handling, longevity, and optimal mileage. Red Diamond Air Booster makes complete tire inflation reliable, simple, and quick.

Red Diamond Air Booster doubles your onboard chassis air pressure, inflating tires to the recommended PSI in seconds. Its compact design saves space, connects easily to your coach, and works with your onboard air supply—no electricity needed.

## Pump it up

The large size and volume of motorcoach tires exerts pressure of their own, resisting full inflation. Red Diamond Air Booster overcomes this force by delivering twice the pressure of internal air systems.

2X THE PRESSURE

### How it works:

- Compatible with any recreational vehicle that has an onboard air supply
- Includes mounting hardware — installs in approximately 30 minutes
- Engineered less than 10 inches wide to integrate under the carriage neatly.
- Quick connect feature attaches easily to onboard air supply
- Moving cylinder technology inside the booster compresses air, doubling pressure output
- Provides 200+ PSI as needed
- Integrated muffler
- Regulator gauge helps prevent overinflation

### Kit includes:

- Red Diamond Air Booster
- 8' air hose
- 1/4" ball valve
- All necessary fittings
- Instruction manual
